PROFESSIONAL SUMMARY

Full Stack Developer skilled in the MERN stack (MongoDB, Express, React, Node.js) and Java/OOP, with a strong foundation in DSA, DBMS, and system design. Seeking a Junior Software Developer role to build scalable, database-driven applications. Focused on building scalable, reliable systems and efficient APIs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs

Frontend: React.js, Redux, Bootstrap, Tailwind CSS

Database: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, GitHub

Tools & Technologies: Postman, Vercel, Render, VS Code, npm

PROFESSIONAL EXPERIENCE

MERN Intern | GROWNITED

Jan 2026 - Apr 2026

Ahmedabad, India

- Built reusable, responsive React components (listing cards, booking forms, and user dashboards) integrated with Redux for centralized state management, ensuring consistent data flow across authentication, listings, and booking features.
- Implemented middleware for JWT verification and protected route handling.
- Handled client-side form validation and API error handling for a smoother user experience.
- Designed MongoDB schemas for users, property listings, and bookings.

PROJECTS

EasyStay - Vacation Rental Platform | GitHub

Jan 2026 - Apr 2026

MongoDB | Express.js | React.js | Node.js (MERN)

A full-stack Airbnb-style platform where users can browse, search, and book rental properties with secure payments and reviews.

- Built a full-stack Airbnb-style rental platform using the MERN stack, featuring property listings with search and filter functionality, a wishlist/favorites system, and a reviews and ratings module for user-generated feedback.
- Designed RESTful APIs and MongoDB schemas (via Mongoose) for properties, users, bookings, and reviews, and integrated the Razorpay payment gateway to handle secure transactions within the booking workflow.

Voting App - Online Voting Platform | GitHub

July 2026 - Aug 2026

MongoDB | Express.js | React.js | Node.js (MERN)

A secure full-stack voting platform enabling authenticated users to register, view candidates, and cast votes, with live results and an admin panel for election management.

- Built a full-stack online voting application using the MERN stack, allowing authenticated users to securely cast votes and view live results.
- Developed an admin panel for creating and managing elections and candidates, including controls to configure voting periods and monitor participation.
- Implemented JWT-based authentication to prevent duplicate voting and ensure one-vote-per-user integrity, along with dynamically updating result displays.
- Deployed the application live for end-to-end testing and demonstration.

CERTIFICATIONS & ACHIEVEMENTS

- Blockchain Technology - BSE Institute Limited
- Data Analytics Job Simulation - Deloitte (Forage)

EDUCATION

B.Tech in Information Technology

2022 - 2026

Gujarat Technological University, Ahmedabad | CGPA: 8.22/10.0

Higher Secondary (XII)

2022

N.G. International School, Mehsana | Percentage: 87.4/100
